TIPPING GUIDE

DO THIS

- ✓ Do make sure that you get familiar with tipping guidelines and which industries/occupations accept tips..
- ✓ Do carry cash to ensure you will be able to tip.
- ✓ Do look at your financial plan and make sure you are including tips in your restaurant, personal care and home improvement budget.
- ✓ Do increase your tips to 20-25% to spread some holiday cheer. Of course, make sure you are budgeting for the extra gratuity.
- ✓ During the holidays, do think about people who typically go untipped year-round, like mail carriers, UPS/Fedex Drivers and delivery services. Cash/gifts of \$20 in value, pre-packaged snacks and water by your front door are great options.

DON'T DO THIS

- ✗ Don't withhold a tip for poor service. Tips are usually built into the compensation structure.
- ✗ Don't always go with the suggested tip. Many places have automatic tip suggestions. You should never feel obligated to go beyond what you can reasonably afford.

TIPPING STANDARDS

- \$ If you are dining at a restaurant, consider tipping 15-20%.
- \$ Baristas and bartenders should get between \$2 to \$5 per drink.
- \$ Delivery drivers should get 20% or \$5, whichever is higher.
- \$ Tips for rideshare drivers should be between 15-20%. Consider increasing your tip if they lift heavy luggage.
- \$ Housekeepers should be tipped anywhere between \$3 to \$5 per day.
